The villa is built on a plot of 600 m² surrounded by native vegetation and will have 224 m² of floor space developed on two levels plus a basement floor with a modern architecture and a design of continuous spaces open to the magnificent exterior terraces and swimming pool with garden areas. The qualities used are first class and together with the careful finishes and natural materials, warm and comfortable spaces are achieved.

On the entrance level we find the spacious living room, dining room and kitchen, an elegant, open-plan, modern, warm and light-filled space with large windows that open up to create a continuity between indoors and outdoors. A patio located on this level also acts as natural lighting and gives an extra warmth to the whole room.
